VERTICAL FEED, SHUTTLE

MANUFACTURED AT WATERTOWN, NEW YORK.

We shall aim to give the people the I town Jederson County, N. Y., in Februfords. The demand for their machines has been unprecedented, and to provide for the rapidly increasing sales it has been found

in tools, machinery and stock, and arrange pense of transportation. ments have been completed and are now in 75 chines in 1874, over the number made in their goods as chesp as many others bay. lence of

hat this demand has been created without advertising, or a resort to the many appliances nally brought to bear in foisting upon the public machines of inferior merit. It has become a common practice among large clothing houses to out the under ply longer than the upper one, to allow for the fulling, so that both ends shall come out oven. This defect has brought a well merited Hilld Ware.

SEWING MACHINES. and forms the main reason why first class tailors discard their use in seams requiring strength. This great defect has existed since the first introduction of Sewing Machines, and the world might have ever remained in ignorance

on that point except for the ingenuity of MR, JOB A. DAVIS.

and which is destined to take precedence and lower than any stere in the county. to place it at the head of the long list of first class S-wing Machines at an early day. The Feed used in THE Davis is unlike any
